SEINFORMS

INSTRUCTIONS FOR PRESENTERS

Presenters are encouraged to bring their own laptops and tablets for presentations at the SEINFORMS conference. While the program committee will attempt to have a laptop or two available for loan, this cannot be guaranteed for every session. Presenters are encouraged to bring a backup of their presentation in Microsoft PowerPoint format on flash media (a.k.a. thumb drive) since broadband internet service cannot be guaranteed.

The projectors used by SEINFORMS are older models that only support VGA input. Adapters will be available to convert from USB-C and HDMI output to VGA if your laptop or tablet is not capable of (or does not have) a VGA output.

Please contact the program chair for any special audio-visual needs or considerations.
